

Attention value projection: $\gamma_{ij}/\sqrt{|\gamma_{ii}\gamma_{jj}|}$ at each group's own fork step

Attention value projection: residual cross-correlation $\eta_{ij}^\perp = \langle Q_i, Q_j \rangle$ at each group's own fork step

MLP up-projection: $\gamma_{ij}/\sqrt{|\gamma_{ii}\gamma_{jj}|}$ at each group's own fork step

MLP up-projection: residual cross-correlation $\eta_{ij}^\perp = \langle Q_i, Q_j \rangle$ at each group's own fork step
